**Actions for **V**ulnerable, Elderly, Novice Drivers and Road Users in Europe  
AVENUE for Traffic Safety**

*Vassiliki Danelli-Myлона, Project Coordinator*

Final Dissemination Seminar  
Brussels, 10<sup>th</sup> September 2013

# Main Issues

1. Struggling with the Problem
2. Aiming at the Solution
3. Adopting Best Practices
4. Developing the Model
5. Implementing
6. Achieving Results
7. Next Steps

***Our main priority: to change driver mentality and behaviour***

# The Problem

- Statistics (31.000 road users in EU, 1.3 million globally)
- Economic recession – road safety fell back in agendas
- Road safety diversified
- Poor coordination
- Cultural and national differences
- Various socioeconomic conditions
- Lack of sensitized critical mass & proven effective standardized methodologies
- Wasting resources for developing what other organizations have already done instead of sharing and building on best practices
- Lacking knowledge and awareness

NETWORKS & EDUCATION  
FOR SAFETY IN TRAFFIC

# Aiming at the Solutions (1/2)

## RSI used a different approach

In the short time of its existence, we

- **Cooperated** with professionals
- **Searched** in depth
- **Travelled** all around Europe
- **Shared** expertise
- **Became** member of councils & associations

AVENUE Coordinator:

[www.ioas.gr](http://www.ioas.gr)

CIVI EUROPAEO PRAEMIUM

[www.avenuefortrafficsafety.eu](http://www.avenuefortrafficsafety.eu)

# Aiming at the Solutions (2/2)

## We have identified

- Centers of excellence
- Chambers of innovation
- Best practices
- Visionaries
- Experience
- And some bad examples we have tried to avoid

## We took into account

- European Commission strategy and goals
- The challenge to achieve high impact on society and growth

CIVI EUROPAEO PRAEMIUM

[www.avenuefortrafficsafety.eu](http://www.avenuefortrafficsafety.eu)

# Adopting Best Practices

- Why not combine success stories we have seen, build on our own creativity and innovative potential in order to create something uniquely complete?
- Why not collaborate with value adding partners that share our vision?
- Apart from sharing significant know-how, the collaborative effort could achieve the critical mass and evaluation it needs to showcase its success (or failure)

NEST NETWORKS & EDUCATION FOR SAFETY IN TRAFFIC

# Implementing

- Brought together a consortium of trusted organizations from all over Europe
- Followed best practices, reshaping them to meet the cultural background of each country
- Sourced and acquired the appropriate equipment
- Reached road users through experiential learning
- Cooperated with Media and Communities to run campaigns
- Evaluated all actions
- Put pressure on Policy Makers (nationally and internationally)

AVENUE Coordinator:

[www.ioas.gr](http://www.ioas.gr)

CIVI EUROPAEO PRAEMIUM

[www.avenuefortrafficsafety.eu](http://www.avenuefortrafficsafety.eu)

# The Obstacles

- Economic Recession
- Project was written in the pre-recession era and was executed during the recession
- EC co-financing was only 33%
- The rest would be covered from private sponsorship and own resources
- Level of private funding significantly dropped during the crisis especially for the Southern Europe partners

AVENUE Coordinator:

[www.ioas.gr](http://www.ioas.gr)

CIVI EUROPAEO PRAEMIUM

[www.avenuefortrafficsafety.eu](http://www.avenuefortrafficsafety.eu)

# Overcoming difficulties

- Proactivity
- Determination & Commitment
- Attraction of new partners, alliances developed
- Increase of volunteer participation
- Despite a slow start because resources were dedicated towards sourcing funding, the project quickly picked up and overachieved its objectives

***In times of recession we feel we have grown stronger through this challenge***

# Developing the Model

## NESTs: the core of an educational puzzle:

- ✓ Always space for more pieces (modules) to be added
  - ✓ Always offering a clear picture of the work being carried out
- 
- Educational equipment
  - Experiential learning
  - Educational modules
  - Campaigns
  - Volunteers
  - Road Safety experts
  - Unique Road Safety Ecosystem creation
  - Adapted to local conditions and available resources

# Next Steps in Progress (1/2)

The model has been developed

- Packaged module based material, easy to disseminate and replicate
- Evaluation of individual actions as well as the NEST model as a whole
- Policy makers around the world have seen and have been attracted for adopting the NESTs as best practice

## Next Steps in Progress (2/2)

### NEST model expansion

- Project partners already aiming to expand activity through experience and
- RSI in the near future aims at creating a complete NESTS installation in Northern Greece as well as in FYROM.
- Involvement of more in the NEST model NGOs associated with road safety
- Promote the NEST model for other social aims (e.g. health and education)
- Improve NEST by updating and adding new educational modules

**RSI has won a TOYOTA Fund for Europe Grant for developing a new experiential learning module for the NEST**
